

QObject

```
classDiagram
    class QObject
    class DaemonClient["ros2monitor::DaemonClient"]
    DaemonClient --|> QObject
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'QObject'. Below it is a box labeled 'ros2monitor::DaemonClient'. A blue arrow points from the 'ros2monitor::DaemonClient' box up to the 'QObject' box, indicating that 'ros2monitor::DaemonClient' inherits from 'QObject'.

ros2monitor::DaemonClient
